

ALIZA FELDSTEIN

COMPUTER SCIENCE STUDENT | FULL-STACK & AI SECURITY

CONTACT

- 050-634-9536
- alizalazar9@gmail.com
- LinkedIn | GitHub

EDUCATION

- 2023-2026
- ARIEL UNIVERSITY
- B.Sc. in Computer Science
- GPA: 82.3
- Cybersecurity Track:
 - Network Security
 - Secure Communication
 - Malware Analysis

SKILLS

- Microsoft Power Automate
- Java, Python, C++, C
- Cybersecurity: Secure Coding, Threat Detection, Malware Analysis, Secure System Design, Security Research
- Angular, REST APIs, Frontend/Backend Integration
- Linux, Git, Machine Learning,
- Angular, Data Processing
- Multitasking & real-time prioritization

LANGUAGES

- English – Mother tongue
- Hebrew – Native

PROFILE

Computer Science student specializing in Cybersecurity and Full-Stack Development, with hands-on experience building scalable tools and automation systems. Skilled in Python, Angular, and REST APIs, with a strong ability to quickly learn new technologies and work across multiple technical domains. Passionate about developing efficient internal platforms and improving system performance through automation.

WORK EXPERIENCE

- Texas Instruments2025- PRESENT
 - Software Engineering Intern
 - Developing a modular web-based application container platform.
 - Designing and implementing full-stack architecture using Angular (frontend) and Python (REST APIs).
 - Building a centralized platform that unifies engineering toolboxes into a single, app-store-like environment. Enables users to access and manage all tools from one interface.
- Vigilance SecurityPRESENT
 - Cybersecurity & AI Security Research
 - Researching quantum security and AI-based cybersecurity approaches for next-generation threat protection.
- Clear Shift2023-2024
 - IT Intern
 - Designed and implemented Microsoft Flows to automate processes.
 - Partnered with IT team members to enhance system performance and reliability.

PROJECTS

- AI-Based VBS Malware Detection System
 - Developed an AI-based malware detection system for VBScript files using LSTM and ensemble classification.
 - Built deep learning pipeline for feature extraction and automated threat detection
- Encrypted Network Traffic Classification (Machine Learning)
 - Designed a machine learning pipeline for encrypted network traffic classification (APP & ATT).
 - Trained XGBoost models achieving high classification accuracy

MILITARY EXPERIENCE

- Israel Defense Forces – Unit 82002020-2023
 - Classified Course – Advanced technical & operational intelligence.
 - Specialized in intelligence technologies in a classified operational role.
 - Completed intensive training in technical & operational intelligence.
 - Contributed to sensitive missions with precision and confidentiality.
 - Completed Unit 8200 Commanders Course; led technical training and commanded two intelligence bootcamps.
